

VT 229 - Sophomore Clinical Externship

QUALIFYING CORE SITES – 2017

MANOR COLLEGE
700 FOX CHASE ROAD
JENKINTOWN, PENNSYLVANIA 19046
(215) 885-2360

Introduction:

Students are required to complete two 6-week externship rotations. At least one of the two rotations must be completed at a core site. The other site may be another core site or an elective site of the student's choosing. Most students complete externships during the summer or fall semesters.

Process:

Credit for core work is given for the satisfactory completion of 6 weeks of clinical study at any of the following core practices. A core site may be used as an elective site if space is available. Most students complete externships at two core sites.

1. There will be a 2 to 3 week period of time in which students will research externship sites and decide what practices would be best for them. During this time, students are encouraged to search the websites of practices of interest and to meet with Dr. Bassert to discuss long term goals and suitable externship sites. Each student will complete an externship "sign-up" form and an externship goals form and submit them to Dr. Bassert before the announced deadline.
2. **Please do not contact a core site to set up an interview until you have been formally assigned to the site** (or unless Dr. Bassert specifically directs you to do so). Formal assignments will be made about 3-4 weeks after the sign up deadline.
3. You must contact the core sites to which you have been **assigned no less than 2 months before the rotation is to begin**. Allowing more time than this is advisable in the event that you are rejected by the site and must find another one.
4. Once you are formally assigned to sites, you may set up a preliminary interview and tour with the externship's contact person. Be sure to take 3 copies of an up-to-date resume, list of references and your externship goals with you. Dress in business attire for the interview. You will not need a cover letter since you will be present to introduce yourself and your experience.
5. The interview is a time for both you and the site to decide if the student-site match is appropriate. You are not obligated to attend the core site to which you have been assigned. Similarly, the site is not obligated to accept you. Please notify Dr. Bassert right away if you would like to be assigned to another site.

6. After both you and the site agree to be matched. Be sure to contact the externship site 1-2 weeks prior to your rotation to confirm daily work hours, directions to the site and required uniform.
7. In the event of unforeseen circumstances that preclude your attendance, you must notify the practice as soon as possible regarding the emergency or illness.
